### Targeting Technology With The USA Pinpointer PRO

### ART Makes The USA Double Magnum Easy To Use!

Pinpointer 2.0 ART is here!

Our Pinpointer system for all of the USA Systems now has ART Audio Response Targeting like a metal detector for heads up detection making rapid pinpointing of target and depth estimation even easier. Great for pinpointing tunnels, metals, voids, gold veins, lost treasure, utilities and other underground

anomalies. **Now Available with Double Magnum.** Read more about the pinpointer [Read All About It!](#)

**"The Thrill of The Finds!"**

The Magnum has a double sensor antenna which is designed for the purpose of locating larger items including buried treasures, caves, tunnels and voids. See subsurface objects in real-time with the GeoSurveyor 3D software and the Runabout, Discovery and Imager units. The Magnum receives a high sampling rate in favorable ground conditions and can detect larger objects and tunnels at 120 feet. The USA comes complete with a pre-configured laptop computer, control unit, sensor housing, extension shaft, battery, charger, all connection cables, custom dual field pack with Camelbak personal water reservoir, carrying case, video, user manual, 1-hour tech support or training by appointment (on-site) and a 3-year limited warranty. The Magnum is the choice of many hobbyists and treasure hunter.

Package price **includes** a pre-configured 12" or 14" **Laptop computer**.\* You may supply your own Pentium 3 equivalent or better laptop for a **\$600.00(USD)** discount.

\*Laptop make and model subject to change without notice
